COMPLETE SUPPLY CHAIN VISIBILITY

Built For the Supply Chain

Our proprietary low-power multi-sensor trackers use global cellular connectivity and on-board sensors to provide real-time monitoring of shipments so you are always aware of location, shipment integrity and climate.

Managed in the Cloud

Create shipment profiles, set custom alerts, configure geofences, and use of our API to pull data into your TMS, ERP, or SCM systems – Tive makes it easy to get the information you need, when you need it.

Insights, not data

The Freightgate platform analyzes your shipments' tracker data and turns it into actionable, real-time insights. Freightgate provides alerts, reports, and all the tools you need to understand and optimize your supply chain from end to end.

WORLD'S SMARTEST SUPPLY CHAIN TRACKERS

Flagship Tracker

Proprietary multi-sensor trackers can be returned in the mail, and they give you real-time visibility into the location and condition of your in-transit goods, at the item-level, from end to end.

Solo 2G

Track real-time temperature and location for up to 30 days with Freightgate's innovative single-use and disposable tracker.

Beacon

Track real-time temperature and location for up to 3-years with innovative beacons that connect to the Flagship Tracker or Freightgate's Solo 5G.

5G Tracker

World's first single-use multi-sensor tracker provides real-time visibility into the location, temperature, humidity, shock, and light of your goods in-transit, at the item-level, from end to end.
